

IMPROVING GREEN INNOVATION FOR THE BLUE REVOLUTION

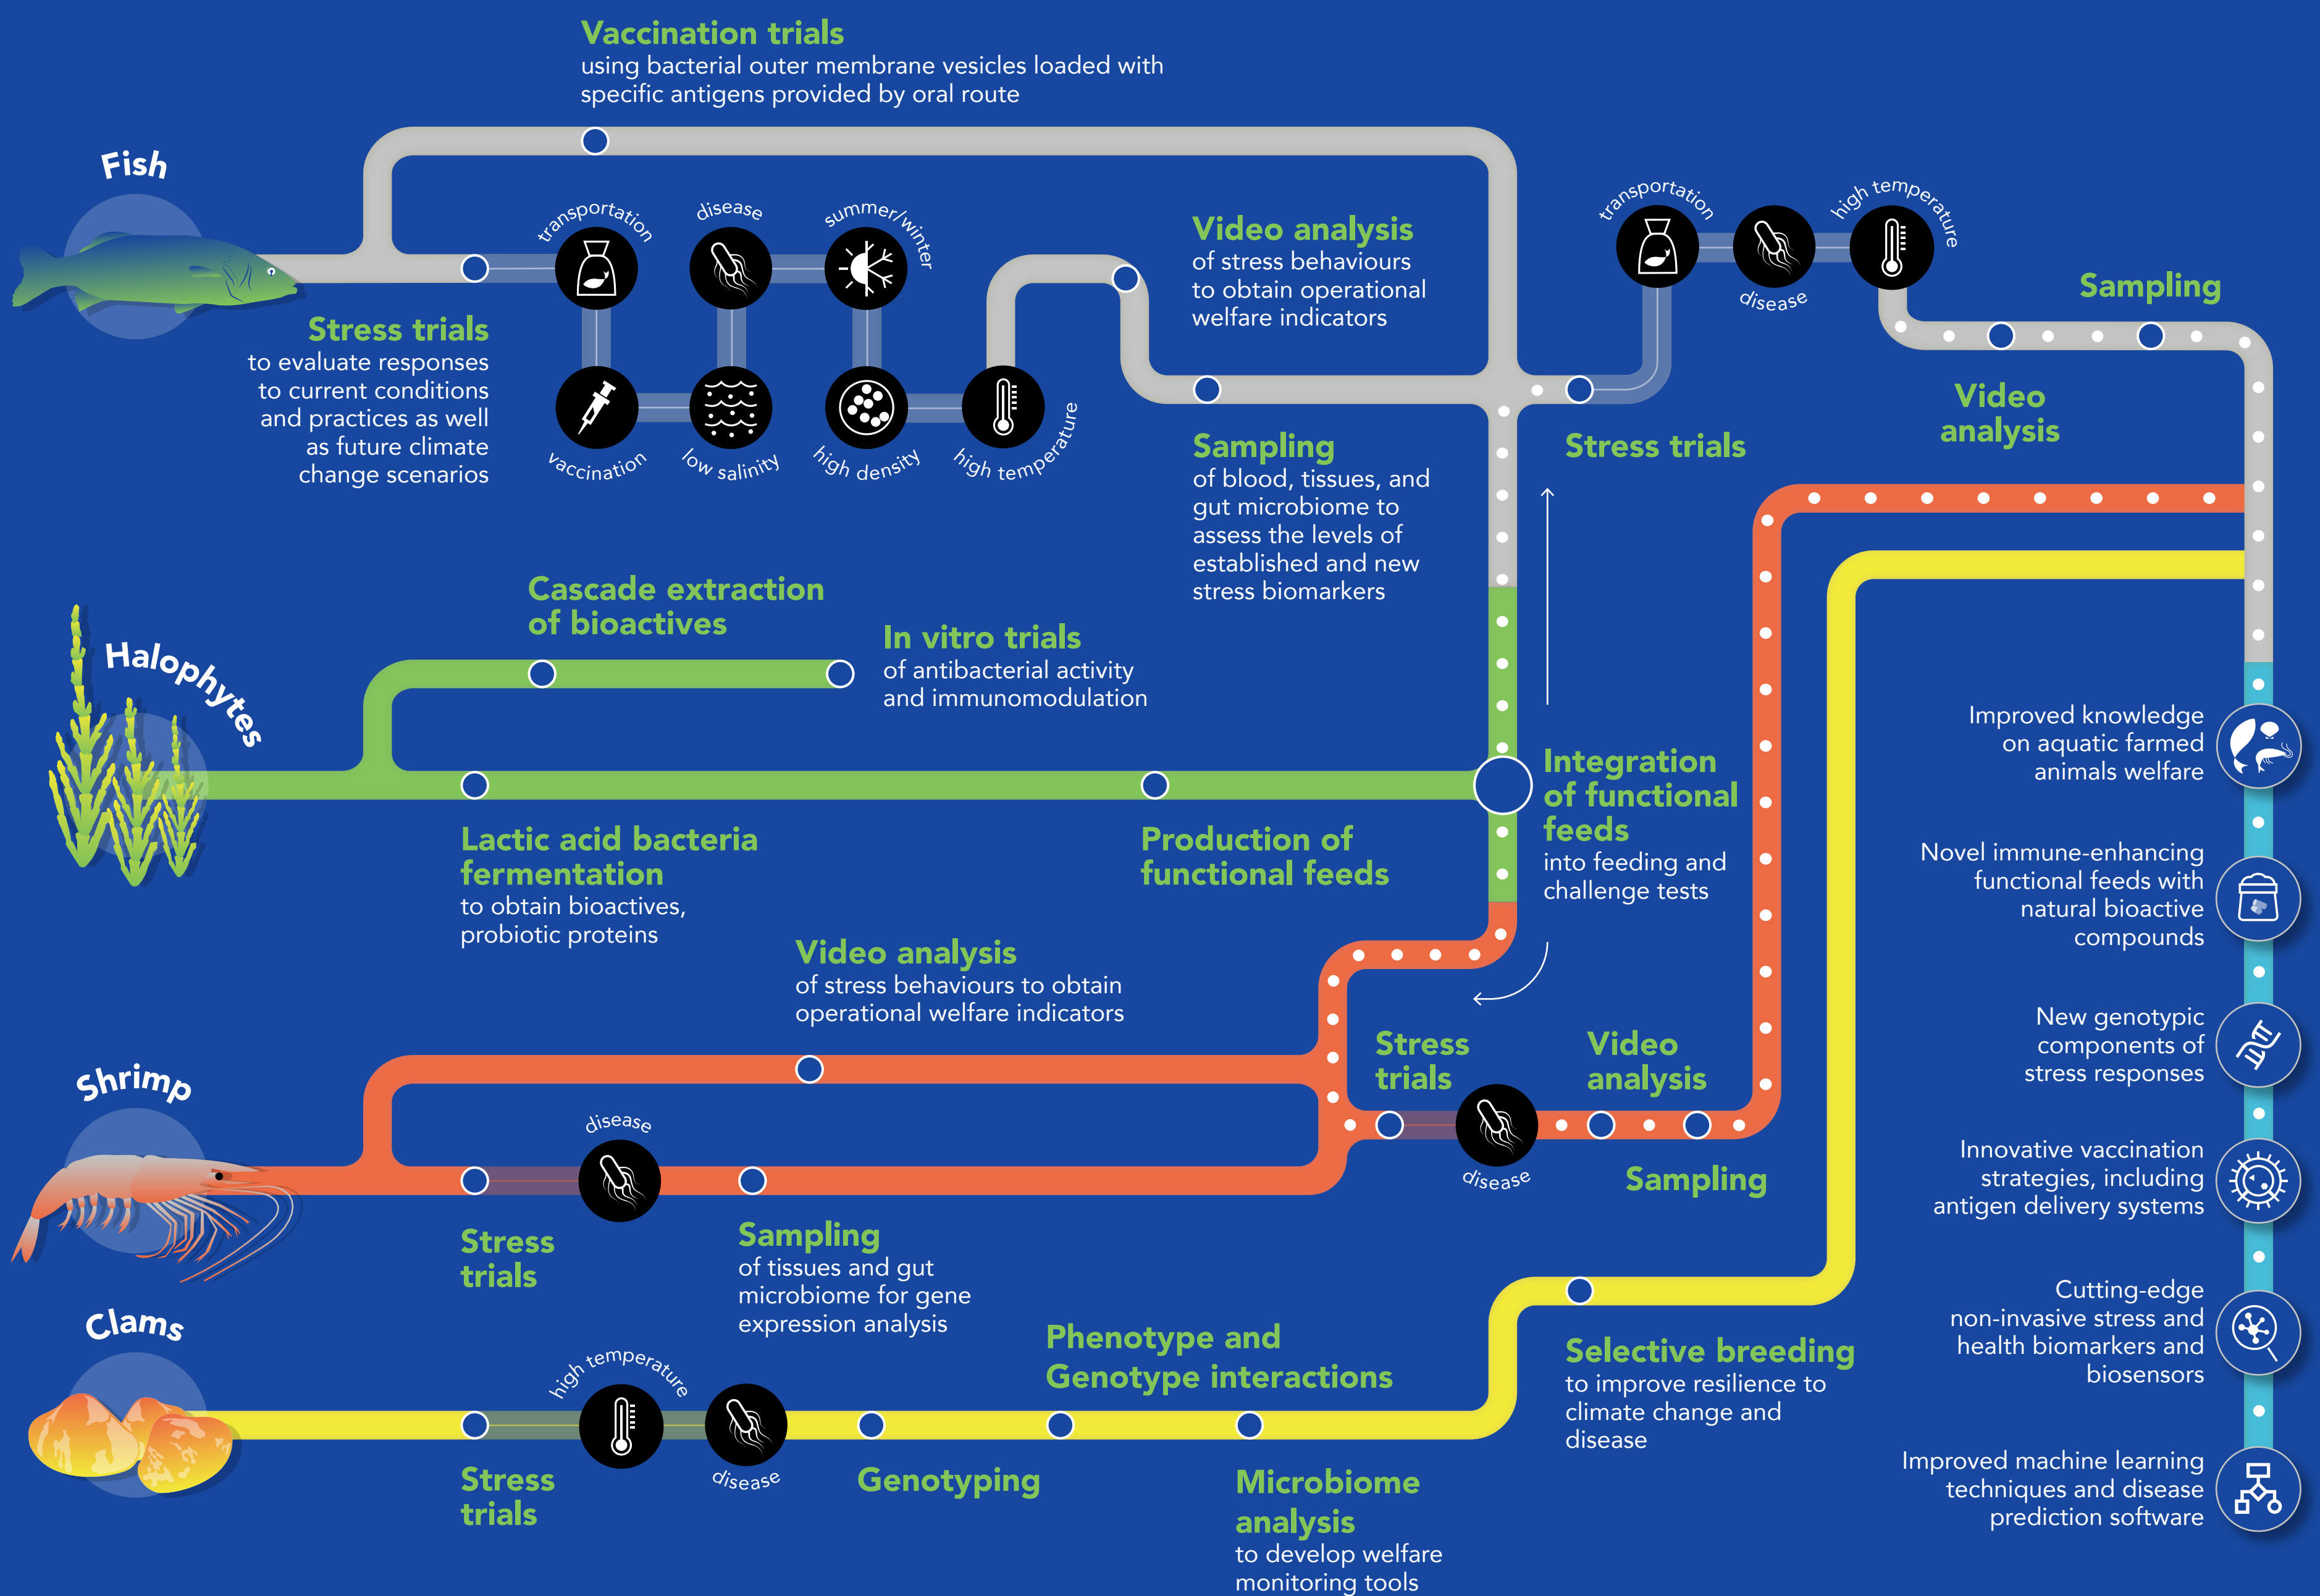

THE DEMAND

As the pressure to produce high-quality protein increases upon the aquaculture sector, so does the demand for production practices that are sustainable, ethical, and consider animal welfare.

THE PURPOSE

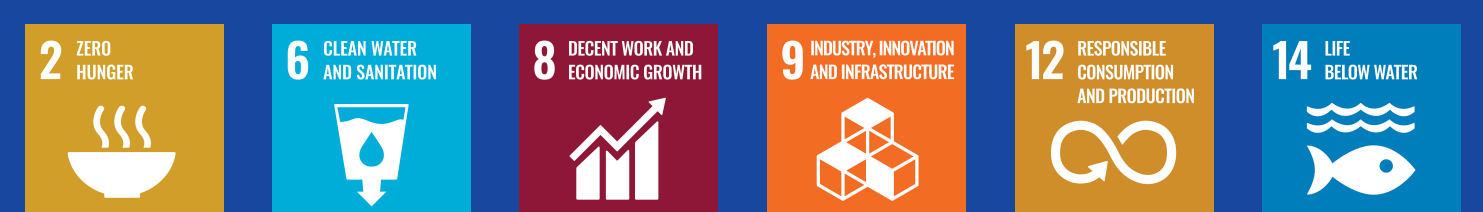

IGNITION is an HORIZON EUROPE project that will gather new knowledge on animal welfare in the context of climate change, and establish novel therapeutic strategies as alternatives to the use of antimicrobials.

THE METHOD

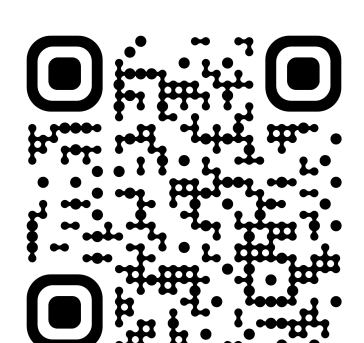

THE IMPACTS

- Increase revenue and new business opportunities;
- Increase the value of new bioactive-enriched feeds;
- Reduce antimicrobials' use and its associated risks;
- Improve circular economy;
- Contribute to six **UN Sustainable Development Goals**:

Consortium

Co-funded by the European Union and the UK Research and Innovation (UKRI). Views and opinions expressed are however those of the authors only and do not necessarily reflect those of the European Union, the Research Executive Agency (REA) or the UKRI. Neither the European Union nor the granting authorities can be held responsible for them.
